

WHAT: Join us for a commercial energy code workshop sponsored by the Alabama Department of Community & Economic Affairs (ADECA) and Southface! You'll learn the following:

- The specifics of implementing ASHRAE 90.1-2007, the minimum energy standard accepted by the U.S. Green Building Council's LEED green building certification program.
- How to reduce your operating costs and add real value to your projects through energy- efficient building design.
- Building science-based strategies for achieving tight building envelopes, plus energy-efficient HVAC and lighting systems.
- How COMcheck software demonstrates compliance with ASHRAE standards.

WHO: This workshop is ideal for building code officials, policymakers, design and construction professionals, professional and trade association members, affordable housing advocates and practitioners, building product manufacturers, distributors and vendors.

WHEN: April 21, 2010, 8:30 a.m. to 5:00 p.m.

WHERE: Mobile Gas Service Office
2828 Dauphin Street
Mobile, AL

Continuing education units available • \$50 per attendee • Lunch provided
